

THE ICE CAVES · THE FEROCIOUS YETI · EVERY UNIT, EVERY DIFFICULTY

What every cave yeti, spearman, fisher, dark yeti swordsman and THE FEROCIOUS YETI does to your men on EASY, MEDIUM, HARD and MEGA, with every body's HP and head-count · read out of the live game v32.45 on Nov 14, 2026 14:06 EST · every damage number checked on the game's own machines (Chrome 401/401 · WebKit 401/401) · for Raziya

The one thing to know: no blow in the caves kills outright any more (since v29.70: no instant KO anywhere). The three that did, a swordsman's cut and THE FEROCIOUS YETI's landing (THE CHOMP, 58 px wide) on a lesser foot soldier and the falling ice on any man, now land **the KO price**, 31.5 · 31.5 · 31.5 · 40.5 HP whole by tier; and since v31.24 a spearman's charge and a cut on Sarge, the medic, a spared heavy or a hero land **one rifleman bar**, 22 · 22 · 22 · 29 HP whole. Both are worked off his bar as HP × bar ÷ his HP, with no share and no damper: **a rifleman falls to any of them**; **every other man stands**, on 15 % of his bar if the blow would have emptied a full one (THE FLOOR, since v31.00: no single hit fells a non-rifleman from a full bar), so a M. gunner keeps 0.88 of 8.75 bar hits after THE CHOMP on EASY. The jeep and the tank are still wrecked by the ice (a machine is never priced). Every other blow is **bar hits** off the one bar every man carries (8.8 for the men, 7.5 for the medic, 12 for the saber Sarge) × the share × the damper: a cave yeti's landing, a fisher's fish and the stomp 1 · 1 · 2 · 2 by tier, the chase's run 2, THE CHOMP on Sarge, the medic and the heavies 2 · 3 · 4 · 4, and since Nov 10 the stomp's four little hops up close (7 bar hits each). One blow reaches at most 3 · 4 · 4 · 5 men (THE CAP). **And the heavies are heavy here**: on top of the caves' bar (×1.25 · 1.2 · 1.15 · 1.1 by tier for every man but Sarge) the flame, the bazooka and the commando carry ×1.5 · 1.5 · 1.4 · 1.3 more, so on EASY a flame (99 HP) stands 29 landings to a rifleman's 19. **King Yeti and King Rex are the exception the other way**: every cave creature's blow bounces off their hide (measured: nothing lands but the ice, and the ice is the KO price on them too). Difficulty changes the bar hits (1 → 2 from HARD), THE CHOMP (2 · 3 · 4 · 4), the KO price (31.5 · 31.5 · 31.5 · 40.5), the bodies (×1 · 1.5 · 2.2 · 2.64), the head-counts, his bar (2,312 · 3,083 · 4,624 · 5,670) and the lab's level.

THE BOSS LAB fights the caves with its stock army at **LEVEL 45 on EASY, 47 on MEDIUM, 48 on HARD and 50 on MEGA**: Sarge with the saber, the jeep, the tank and the dogfighter (the bomber on MEGA), the jet pack on, and eight men at that rank (rifleman, M. gunner, bazooka, mortar, medic, flame, sweeper, radio man; MEGA swaps the radio man for the bomber). The grenadier, the commando and the spy are a tap away in THE PLATOON. Every "level" number on this page is that army at that tier's level. At levels 45 to 48 the men's HP is the same number (the ladder steps every tenth level); 50 is a step up.

live since	when	card	what it does in this fight
v31.35	Nov 10	**CARD-FYM · THE STOMP'S LITTLE HOPS**	His jig after the stomp hits: four little hops in place, each 7 bar hits × the share × the damper on every man within 80 px of his feet who is not still sliding from the bowl-over (the flame, the bazooka and the commando ×0.5 · 0.5 · 0.45 · 0.4; from full health a hop lands at most 90 % of a bar). Measured with the man held at 40 px: a rifleman falls at hop 3 on EASY, a flame stands the four. His arms, body and face move in every move (the paint).
v31.33	Nov 10	**CARD-IMH · THE ICICLES MAKE THE HOLES**	From his arrival a heavy icicle falls on its own clock (every 16 · 14 · 12 · 10 s, at most 2 · 3 · 3 · 4 made holes open, a 2.6 s shadow) at a spot hashed off the fight's seed, never aimed at a man; under it a unit takes what a shard deals (the KO price); its crater is a hole and a yeti door until the water flash-freezes it (14 · 16 · 18 · 20 s); THE CAVE-IN's band leaves 2 behind it. Off in this page's stagings (it lands through the shard's own door, measured).
v31.36	Nov 10	**CARD-CYT · THE CAVE YETI PAYS 10 DOG TAGS LESS**	A cave yeti pays 30 · 26 · 22 · 20 dog tags by tier (was 40 · 36 · 32 · 30 on v29.45: 10 · 10 · 10 · 10 off; measured as born).

live since	when	card	what it does in this fight
v31.24	Nov 10	**CARD-ICS · THE SPEAR AND THE SWORD FELL A RIFLEMAN**	A spearman's charge and a cut on Sarge, the medic, a spared heavy or a hero land **one rifleman bar**: the rifleman's HP at the KO price's rank, 22 · 22 · 22 · 29 HP whole (the HP × bar ÷ HP of his bar hits, no share, no damper): a rifleman falls to one, the M. gunner keeps 3.25 of 8.75 bar hits on EASY, the medic stands on 15 % (the floor); was 1 · 1 · 2 · 2 and 3 bar hits × the share. And the fisher's Snappers (no mother fish; a pack out of the hole nearest a fish, a leap, a bite of 2 · 2 · 2 · 2 bar hits), the big puff of snow, MISSION ACCOMPLISHED!
v31.00	Nov 6	**CARD-RZB · THE FLOOR AND THE CAP**	On EASY to MEGA no single hit fells a non-rifleman (Sarge counts) from a full bar: the hit that would empty it leaves him on 15 % of it (U5); a rifleman falls. One blow (a spot inside 0.75 s) reaches at most 3 · 4 · 4 · 5 men (U4; measured: one stomp over the cap + 2 riflemen, 2 took nothing). ULTRA MEGA reads none of it.
v29.70	Nov 3	**CARD-BDC2 · NO INSTANT KO + THE HEAVY CLASS**	No blow kills outright any more: the swordsman's cut and THE CHOMP on a lesser foot soldier and the falling ice on any man land **the KO price**, 0.9 × the M. gunner's HP at the chart's rank for the caves' level (80 → rank 46; MEGA 120 → 69) = 31.5 · 31.5 · 31.5 · 40.5 HP whole: a rifleman falls, the M. gunner keeps 0.88 of 8.75 bar hits on EASY, everyone else stands (the floor since v31.00); a machine under the ice is still wrecked. THE HEAVY CLASS: the bazooka, the flame and the commando read max(their own HP, 2 × the M. gunner's): at level 45 the bazooka 60 → **70** HP, the commando 69 → **70**; at 50 74 → 80 and 83 → 83 (was = v29.45); their bars unchanged.
v29.41	Nov 2	**CARD-DHP · DOUBLE HP, THE SHOTGUN**	The bazooka's and the commando's tenth-rank HP bonus doubled (+10 HP a rung) and shotgun Sarge wears +20 HP per ten shotgun ranks while the shotgun is in his hands: at the lab's level 45 to 48 the bazooka 40 → 60 HP, the commando 49 → 69, the shotgun Sarge 32 → 112; at 50: 49 → 74, 58 → 83, 35 → 135 (was = client v29.24). A bar hit lands a hair lighter on them; the kill doors do not care.
v29.40	Nov 2	**CARD-FLT · THE FLAME'S RUNGS TRIPLED**	The flame's +6 HP every tenth rank pays three times that through level 50: at the lab's level 45 to 48 the flame 51 → 99 HP, at 50: 61 → 121 (was = client v29.24). He stands the bar-hit blows longer (WHO SURVIVES); the cut and THE CHOMP already spare him since v29.13; the ice still kills.
v29.37	Nov 2	**CARD-RXT · THE DESIGNERS' TIME-TO-KILL CHART**	THE DESIGNERS' TIME-TO-KILL CHART: his bar for one commander on EASY · MEDIUM · HARD is the chart's cell, 1080 · 1890 · 1881 → 2312 · 3083 · 4624 HP (was = client v29.24); the wrap writes the sheet row's multiplier over the base at the fight's birth (x2.4 · 2.8 · 1.9 → x5.1378 · 4.5674 · 4.6707, the dial under it unchanged), so a party bar lands within 3 HP of solo x (1 + 0.9 a commander past the first): with two 2052 · 3590 · 3574 → 4393 · 5855 · 8786. MEGA's bar is the player-damage-threshold pass's (the row below).
v29.30	Nov 2	**CARD-PDT · THE PLAYER-DAMAGE-THRESHOLD PASS**	THE PLAYER-DAMAGE-THRESHOLD PASS: his bar for one commander on MEGA is the pass's table number, 3089 → 5670 HP (was = client v29.24; the row runs at x4.7724 over the base, the dial x2.6 under it); with two 5868 → 10771. Its EASY · MEDIUM · HARD cells gave way to the designers' time-to-kill chart the same day (the row above).
v29.17	Nov 1	**CARD-DMP · THE DAMPER**	Every enemy blow on your men lands at 50 % of its size in the campaign and every boss fight (the Boss Lab too): a man stands about twice the bar-hit blows of the page before it; a kill blow is still a kill.
v29.13	Nov 1	**CARD-ICP · THE PACING PASS**	The cave creatures step ×0.7 · 0.75 · 0.8 · 0.85 and THE FEROCIOUS YETI ×0.75 · 0.8 · 0.85 · 0.9 by tier; every bar of your side but Sarge ×1.25 · 1.2 · 1.15 · 1.1, the flame's, the bazooka's and the commando's ×1.5 · 1.5 · 1.4 · 1.3 more; the swordsman's cut and THE CHOMP spare those three (they take the bar hits); the falling ice still kills.
v29.00	Nov 1	**CARD-ICN-G3 · THE HOLES ARE REAL**	A hole's rim steers a man's step, a man pushed across a rim falls in (the pit law), and the hand is refused at a rim.
v28.99	Nov 1	**CARD-ICN4 · THE CAVES' PURSE**	A cave creature pays its bounty × 4 · 3.6 · 3.2 · 3 dog tags by tier (a cave yeti 30 · 26 · 22 · 20, a swordsman 120 · 108 · 96 · 90; measured as born); a man THE CAVE-IN's band kills gets ×1 · 1 · 0.75 · 0.5 of his price back in all.
v28.98	Nov 1	**CARD-ICN-G1 · THE HOLES IN VIEW**	The caves pan down for the hand like the flat rugs, so the bottom row of holes clears the troop tray on a phone.
v28.97	Nov 1	**CARD-ICN-G2 · THE QUIET START**	The first burst at 8 · 6 · 5 · 4 s by tier (was 2.5 everywhere), the three holes nearest the toy box asleep till 25 · 20 · 15 · 10 s (never past his arrival), and the lab forgets the speed dial on a reload.
v28.74	Oct 31	**CARD-HP3 · THE HEAVIES**	+3 HP every tenth rank for the bazooka, grenadier, flame and commando. The grenadier at level 45 to 48: 37 HP; at 50: 45. The bazooka's, the flame's and the commando's rungs are re-priced since (the Nov 2 rows above). A bar hit lands a hair lighter on them (the share); the three kill doors do not care.
v28.65	Oct 30	**CARD-LRB · ONE HP NUMBER**	Your man's HP is the number on his unit sheet; a bar hit lands 90 % + 10 % × bar ÷ HP of itself (a level-45 flame takes 0.46 of a cave yeti's 1, a rifleman 0.47).

v28.46	Oct 30	**CARD-BLP · THE BOSS LAB'S STOCK ARMY**	The lab fights the caves with its own army at LEVEL 45 · 47 · 48 · 50 (the lab's level sheet for the caves reads 45–50, spread over the four tiers): the one this page reads.
read	Oct 10	**CARD-BHP · ONE BOSS, MORE HEALTH**	A party grows his bar (×1 + 0.9 a commander past the first) instead of multiplying him.
read	Oct 8	**CARD-ICB · A FIGHT WITH NO DARK**	His bar's dial re-priced for a fight all on the floor: ×2.4 · 2.8 · 1.9 · 2.6 by tier (was 0.8 · 2.24 · 1.52 · 2.08 before Oct 3's –20 % and this); since Nov 2 the chart's bar and the threshold pass's are written over it.
read	Oct 5	**CARD-CIR · THE COMMANDO'S ROOF**	A commando's shield breaks a falling shard over him or over any man within 120 px of him, once (his charge), measured on every tier.
read	Oct 3	**CARD-CVX · HIS BAR –20 %**	Wyatt 10/3: the Ferocious Yeti's health down 20 % on every difficulty; the fisher throws at a plane nearer than his man.
read	Oct 2	**CARD-HRT-C3 · THE PACE**	The cave-in's band walks its span in 9 · 13 · 16 · 18 s by tier; MEGA's swordsmen 1 a call, 2 live; MEGA's roar wakes 2 cave yetis.
read	Sep 26	**CARD-YF1 · YF3 · YF4 · CF · THE HITS LAND**	The swordsman's cut downs a foot soldier; THE CHOMP (his landing, 58 px wide) kills the foot soldiers under it and the rampage is his default landing (3 · 4 · 5 · 6 bounds); the falling ice kills (Wyatt 9/25: "the stalagmites, when they fall, need to destroy just about any unit"); the storm's pace by tier.
read	Sep 24	**CARD-YB · YR · THE SPEARMAN, THE FISHER, THE STORM**	The spearman's charge and the fisher's fish join the cave yetis; the stalactite storm aimed at the men.
read	Sep 22	**CARD-DY · IBC · THE SWORDSMAN, THE RAIDERS**	The dark yeti swordsman (the lunge, three cuts) and the raiders who take the toy box.

How a hit is counted

Your men carry **HP**: the number on their unit sheet (a level-45 flame has 99, a rifleman 22; at level 50: 121 and 26). Their health bar is also cut into a few **bar hits** on EASY 8.8 for most men, 7.5 for the medic and the spy, 13.1 for the flame and the bazooka, 15 for the commando, 12 for the saber Sarge, 23 for the Claymore Sarge; every man's but Sarge's ×1.25 · 1.2 · 1.15 · 1.1 by tier in the caves). Two kinds of blow in this fight:

- **Priced blows** (no KO since v29.70): a swordsman's cut and THE CHOMP on a lesser foot soldier (rifleman, M. gunner, mortar, grenadier, sweeper, radio man, spy) and the falling ice on any man take **the KO price**, 0.9 × the M. gunner's HP at the chart's rank for the caves' level (80 → rank 46; MEGA 120 → 69) = 31.5 · 31.5 · 31.5 · 40.5 HP; a spearman's charge and a cut on Sarge, the medic, a spared heavy or a hero take **one rifleman bar** (his HP at the same rank) = 22 · 22 · 22 · 29 HP (since v31.24). Either lands whole (no share, no damper) as HP × bar ÷ his HP of his bar hits. If it would empty a full bar, a rifleman falls and any other man (Sarge counts) stands on 15 % of it (THE FLOOR, since v31.00); the next hit that reaches his bar fells him. A wall still turns them: a pet's shield, Francis's block, the commando's roof, the blue wall or the dome turns the blow into bar hits (1 · 1 · 2 · 2 for the cut, 3 for a shard); the champion's grace once a life. A machine under the ice is still wrecked.
- **Bar hits** (a landing, a fish, the stomp: 1 · 1 · 2 · 2; the run: 2; THE CHOMP on Sarge, the medic, a spared heavy, a machine or a hero: 2 · 3 · 4 · 4; a cut on a machine: 3; each of the stomp's little hops: 7, the heavies ×0.5 · 0.5 · 0.45 · 0.4): since v28.65 a bar hit lands 90 % + 10 % × bar ÷ HP, and since v29.17 **THE DAMPER** lets 50 % of every enemy blow land in the campaign and every boss fight (a priced blow is not dampened), so a level-45 rifleman takes 0.47 of his 8.8 from a cave yeti's landing (1.2 HP of 22). A hero's share is 1. A man who takes no hit for 4 s mends one bar hit, and again every 4 s. One blow (a spot inside 0.75 s) reaches at most 3 · 4 · 4 · 5 men (THE CAP, since v31.00).

Saves still roll on every bar hit: a jetting, dropping or dragged man cannot be touched, the pet shield, the deflect dome, the absorbs, and **the saber Sarge's block turns a landing, a charge, a fish, a cut or THE CHOMP about half the time** (measured: 2–9 of 10 landings, 3–7 of 10 cuts and 5–8 of 10 chomps turned over the four tiers and both engines). **King Yeti's and King Rex's hide turns every blow of a**

cave creature (a thrown-snow law: the whole cave family counts as snow), the falling ice alone lands on them (the KO price). The Claymore Sarge's counted block and the riot plate keep their say (measured: the Claymore Sarge turned every cut, chomp and shard). Nothing else turns the ice but a shield or the saber's block.

An HP number = a priced blow (the KO price, or one rifleman bar), landing whole: HP × bar ÷ his HP of his bar hits, a rifleman falls if it reaches his bar, any other man stands on 15 % of a full one. Any other number = the bar hits one blow lands on your man before his share: the number shipped × the damper (50 % since v29.17; the since column names the number shipped). share = 90 % + 10 % × the man's bar hits ÷ his HP (CARD-LRB). The caves' dials sit in THE BOSS LAB's RULES under THE ICE CAVES (58 cells: his bar, his strike clock, his chomp, the chase's pace, the dark, the hold, the eyes, the calls, the bursts, a landing, the storm, the bounce chain, the swarms, the cave-in, the march, the swordsmen, a cut): a typed cell is what the next lab fight uses.

LANDINGS · FISH · STOMPS: the same 1 · 1 · 2 · 2 bar hits × the share, by the sum (a man mends one bar hit for every 4 s left alone, so a lone cave yeti on his 1 s dance and 1.5–3 s in the hole often needs one more). THE SPEAR'S CHARGE: one rifleman bar (22 · 22 · 22 · 29 HP) whole: KO = he falls to one (a rifleman), 2 = it would empty his full bar, he stands on 15 % and the next fells him (THE FLOOR). RUN: the chase's 2 bar hits every 0.5 s under him, inside the mend. THE CHOMP and THE CUT: a foot soldier takes the KO price (31.5 · 31.5 · 31.5 · 40.5 HP) whole; THE CHOMP on Sarge, the medic and the spared heavies is 2 · 3 · 4 · 4 bar hits × the share, a cut on them one rifleman bar. The saber Sarge's cells: his blade turns about half of every blow, the priced ones too (measured). THE FALLING ICE: the KO price on any man (1+n = the commando's shield breaks the first shard over him, then n). On EASY to MEGA no man but a rifleman falls to fewer than two blows of anything (THE FLOOR).

A hero's share is 1 (his HP is not on the unit sheet), so a hero takes the whole bar hit: a landing 1 · 1 · 2 · 2, THE CHOMP 2 · 3 · 4 · 4, the run 2, the stomp 1 · 1 · 2 · 2; a charge and a cut land one rifleman bar (22 · 22 · 22 · 29 HP × bar ÷ his HP, since v31.24). **King Yeti and King Rex take none of them**: every cave creature is thrown snow to their hide, and it bounces (measured on every tier, both engines). The falling ice is the KO price on every hero (31.5 · 31.5 · 31.5 · 40.5 HP × bar ÷ his HP; the hide does not turn it): measured, all six stand, every tier.

The level a man first survives

For the bar-hit blows and, since v29.70, the priced ones too (no blow kills outright): MEGA's chomp and cut on a foot soldier and the falling ice take the KO price (40.5 HP), a charge and a cut on Sarge or the medic one rifleman bar (29 HP), whole. Every man but the rifleman stands one of them from any rank (THE FLOOR: no single hit fells him from a full bar); the rifleman from the rank his HP passes the price; two in a row from the rank the blow is under half his bar. **Green** = he already does at the lab's EASY level 45; — = not even at rank 100.

Read from the game's own HP and bar ladders at every rank 0–100 (the tenth-rank extras included; no gifts, soul or gear), by the sum of the blows with no mend between. "Two-bar-hit blows" = MEGA's landing, fish or stomp and the run on any tier: 2 × the share each. Sarge's rows read the iron at the same rank.

THE HUNT	1 × the dark · the eyes 0.6 s	0.9 × the dark · the eyes 0.45 s	0.8 × the dark · the eyes 0.35 s	0.7 × the dark · the eyes 0.25 s	ACT I: between strikes he is in the dark (the tier's share of the dark; HARD and MEGA also hold every man within 300 px of his roar for 1 s). Two ice-blue eyes light in the hole he will come out of for the tier's warn, then he bounds out of the hole nearest the man deepest in your line (every third strike out of THE BACK HOLE behind you), a 0.55 s flight that tracks the man's feet, and lands. The landing is one of three on a seven-strike rota: THE RAMPAGE 4 of 7, THE STOMP 2, a single CHOMP 1.
THE CHOMP	31.5 HP · 2 bar hits	31.5 HP · 3 bar hits	31.5 HP · 4 bar hits	40.5 HP · 4 bar hits	His landing, 58 px wide: **every lesser foot soldier under it takes the KO price**, 31.5 · 31.5 · 31.5 · 40.5 HP whole (no instant KO since v29.70; measured on every tier: the rifleman fell, the M. gunner stood on 0.88 of 8.75 bar hits on EASY and 1.16 of 7.7 on MEGA, the grenadier on 1.3; the flame, the bazooka and the commando, spared since v29.13, took the bar hits). The heavies, Sarge, the medic, the jeep, the tank and a hero take 2 · 3 · 4 · 4 bar hits × the share × the damper and the bowl-over (80 px) — measured: the saber Sarge turned 5–8 of 10, the pistol and the Claymore Sarge took the bar hits, King Yeti and King Rex turned every one (their hide). A man under him when he lands is the whole law; the chomp itself is the bite over the man he downed (THE DANCE).
THE RAMPAGE	3 bounds	4 bounds	5 bounds	6 bounds	Four strikes of seven: the landing above, then 2 · 3 · 4 · 5 more bounds in a chain, each at the nearest man within 420 px (0.42 s a bound), each landing **the KO price on the foot soldiers under it** and one bar hit lighter for the rest (1 · 2 · 3 · 3; measured: the medic took 1 on EASY under a rampage's landing, the rifleman beside him fell).
THE STOMP	1 bar hits · 150 px	1 bar hits · 150 px	2 bar hits · 150 px	2 bar hits · 150 px	Two strikes of seven: he lands, rises 0.35 s (the amber ring: the tell), and the shockwave takes 1 · 1 · 2 · 2 bar hits × the share off every man within 150 px and bowls him 130 px (measured on every man at 60 px). Since Nov 10 the shorter jig after it hits: each of its four little hops lands 7 bar hits × the share × the damper on every man within 80 px of his feet who is not still sliding from the bowl-over (the flame, the bazooka and the commando ×0.5 · 0.5 · 0.45 · 0.4; from full health a hop lands at most 90 % of a bar; measured with the man held at 40 px: a rifleman falls at hop 3 on EASY and 3 on MEGA, a medic at 3 · 2, a flame stands the four with 6.28 of 13.12 bar hits left on EASY).
THE FROST BREATH	off	off	off	off	In the file, off the rota: the cone (330 px, 1 bar hit and a freeze of 0.7 · 0.9 · 1.3 · 1.6 s) is never dealt in a fight today (Wyatt 9/26: the animation was never finished). Not measured; nothing to balance.
THE FALLING ICE	every 7 s · 2 clusters	every 6 s · 3 clusters	every 12 s · 2 clusters	every 12 s · 2 clusters	From his arrival, every 7 · 6 · 12 · 12 s a volley of 2 · 3 · 2 · 2 clusters of three shadows, each cluster aimed at a living man on his feet (its first shadow on him). A shadow grows 1.8 s (the premiere's 2.2 s), then the shard lands on every unit within 40 px: **no KO since v29.70**, a man takes the KO price, 31.5 · 31.5 · 31.5 · 40.5 HP whole (measured on every tier, both engines, 1 s after the shadow: the rifleman fell, the M. gunner stood on 0.88 of 8.75 bar hits on EASY, the medic and the pistol Sarge on 15 % of the bar); the jeep and the tank are still wrecked (a machine is never priced), and a hero takes the price too (the hide does not turn the ice). A pet's shield, Francis's block or the blue wall turns a shard into 3 bar hits; the champion's grace once a life. **A commando's shield breaks the first shard** over him or over any man within 120 px of him (his one charge; measured: the rifleman in his circle stood, the commando stood, the shield spent; a second shard over the commando took the KO price: 6.75 of his 15 bar hits on EASY, he stood). The ice falls only while the lights are up: inside THE CAVE-IN it is the band's.
THE CAVE-IN	9 s · 50 % dark	13 s · 40 % dark	16 s · 30 % dark	18 s · 25 % dark	ACT II, under 60 % of his bar: he runs for the mouth, the lights go down, and a BAND of falling ice walks the floor from x 1780 to 40 px outside the toy box's ring in 9 · 13 · 16 · 18 s: rows 64 px apart, 8 seats a row down the floor, a share of the seats left dark (50 % · 40 % · 30 % · 25 %: the gaps a man can stand in), each shadow the storm's 1.8 s tell and the same KO price (since Nov 10 the band also leaves 2 heavy icicles behind it, their craters holes; measured: a band shard felled a rifleman 1.817 s after its shadow). The lights come up at GATE TWO (THE LAST MARCH: his two swordsmen burst out beside him) and the hunt resumes.
THE RAVAGE	—	—	under 26 %	under 26 %	HARD and MEGA only, between the cave-in and the chase: his charges down the hole columns (from the top holes down) and the sweep from the mouth to the back hole, with the swarm (2 · 3 · 5 · 7 cave yetis on the rail); his contact on the run is THE CHASE's (2 bar hits). THE CHASE	210 px/s	165 px/s	190 px/s	210 px/s	ACT III, under 25 % of his bar: out of the mouth and on the floor for good, running at a man at 140 · 165 · 190 · 210 px/s; every man within 40 px takes **2 bar hits × the share** and a bowl-over every 0.5 s he stays under him (measured on every man and hero; King Yeti and King Rex turn it). Every 6 s a roar calls the raiders to the toy box and the swordsmen out. The run is the only time his bar is on the floor to shoot the whole way.
THE GATES	60 % · 25 %	60 % · 25 %	60 % · 26 % · 25 %	60 % · 26 % · 25 %	On his bar: THE CAVE-IN under 60 %; on HARD and MEGA THE RAVAGE under 26 %; THE CHASE under 25 %. Act II's strikes call the cave yetis (2 a wake) and the swordsmen with every strike (Act I: every second).
HIS BAR (one commander, the lab's level)	**2,312**	**3,083**	**4,624**	**5,670**	the designers' time-to-kill chart's cell on EASY · MEDIUM · HARD and the player-damage-threshold pass's on MEGA (Nov 2), written over the row's dial ×2.4 · 2.8 · 1.9 · 2.6 (re-priced Oct 8 for a fight with no dark, cut 20 % Oct 3) as ×5.1378 · 4.5674 · 4.6707 · 4.7724 at the fight's birth. No rung price in the caves. A party grows it ×(1 + 0.9 a commander past the first), measured as born: the table below.
THE HOLES	7	7	7	7	Three in the top wall, three in the bottom, and THE BACK HOLE behind your line (x 236, y 214: 130 is the toy box's x). A cave yeti takes the back hole one trip in four; the boss every third strike. The far mouth (x 1840) is his door alone.

THE TOY BOX	−8 lives if he crosses it	−8 lives if he crosses it	−8 lives if he crosses it	−8 lives if he crosses it	He never marches the box in the hunt: his legs run at your men. The cave yetis do (THE RAIDERS after the first minute, the roar's callers in THE CHASE): a bite costs 1 life.

His bar by the number of commanders

MEGA	5,670	10,771[m]	15,873[m]	20,979	26,081[m]	51,594

The game's own sheet for one to ten commanders at the lab's level: the solo bar (the designers' time-to-kill chart's on EASY · MEDIUM · HARD, the player-damage-threshold pass's on MEGA) × (1 + 0.9 a commander past the first), within 3 HP (the wrap writes the row's multiplier at four decimals); [m] = the boss born in a party of that size was measured at exactly this bar on every tier, both engines. No rung price rides the caves (the Pillow Fields' law is not here).

One wave on the clock: the holes field the cave yetis in five bursts, the spearmen, the fishers and the swordsmen at their premieres, and THE FEROCIOUS YETI shows in the far mouth at 25 s. On top of it all fight: his roar's wakes (2 cave yetis), his strikes' calls (the swordsmen), the cave swarm every 50 · 60 · 60 · 60 s, the raiders' rush every 40 · 30 · 30 · 30 s after the first minute, and the live caps (1–4 spearmen, 1–2 fishers, 1–3 swordsmen, 10 cave yetis; a party adds one).

How this was read and checked

The live client v32.45 (index.html md5 3a46a5281956aeaf75ac23e3b689a4ba, the copy pinned for this read) was opened headless on this Mac and read with the game's own functions: every table, every tier's sheet at the lab's own level, every man's HP and bar at every rank, his bar for 1 to 10 commanders, the lab's 58 cells for the caves. Then each blow was **measured on the real machines** in a BOSS LAB fight on every tier with the stock army worn (level 45 · 47 · 48 · 50), every cave creature born through the game's own door and the boss through his own spout row: a cave yeti's landing on eight men (and ten on the saber Sarge for his block), a spearman's charge on eight (the priced blow), a fisher's fish on eight, a swordsman's three cuts on a flame, a rifleman and a medic together and one cut on each of seven men, the saber Sarge (ten tries), the pistol and the Claymore Sarge, THE CHOMP on eight men, the pistol and the Claymore Sarge, the saber Sarge ten times, the jeep and the tank, and a rampage's lighter landing, the chase's run on eight, the stomp on eight, one stomp over the cap + 2 riflemen (THE CAP), the stomp's little hops on a rifleman, a flame and a medic held at 40 px, a falling shard over eight men, the pistol and the Claymore Sarge, the jeep and the tank, a band's shard, a commando twice (his shield, then the KO price) and the roof over a rifleman, the six heroes under all eight blows, every priced blow against the KO price and the floor read in that same lab fight, every body as the tier bears it, and the boss born in a party of 2, 3 and 5. Chrome 401/401 · WebKit 401/401 checks passed, zero page errors, and the two engines read every number the same. The opening's own clock (the first cave yeti, the box bitten with nothing placed, the lab remembering ×4) is CARD-ICN's read of v28.96, on its page; since then the quiet start moved the first burst to 8 · 6 · 5 · 4 s by tier.
