

QUICK DRAW CROAK'S HIDEOUT · EVERY UNIT, EVERY DIFFICULTY

What Quick Draw Croak, his son, the posse, the ladies, the rattlesnake and the stampede do to your men on EASY, MEDIUM, HARD and MEGA, with every body's HP and head-count · read out of the live game v32.45 on Nov 14, 2026 14:06 EST · every damage number checked on the game's own machines (Chrome 125/125 · WebKit 125/125) · for Raziya

The one thing to know: every hit in the hideout is a **bar hit** (the King Rex page's word): it takes a share of a man's health bar, not a fixed HP. Quick Draw Croak's and his son's hits **grow with difficulty**: × 1 · 1.1 · 1.1 · 1.2 (EASY · MEDIUM · HARD · MEGA). On **MEGA** (CARD-MKC) everything on his side also hits **twice** as hard and has **six times** the bar, so his strong shot is 7.2 bar hits against 4 on EASY. The bandits, sharpshooters, ladies and rattlesnake hit the same on EASY, MEDIUM and HARD. The stampede and the ladies' fire never change. The snake's swallow is built to KO (it carries his whole bar left + 1, × 2 on MEGA), but since the damper it lands at 50 % like every hit: on MEDIUM and HARD a fresh man stands it, and 3 or 4 in a row KO a stock man; on MEGA it still empties a full bar, so a rifleman falls to one and anyone else stands on 15 % of his bar (THE FLOOR since v31.00) and falls to the next.

THE BOSS LAB fights Quick Draw Croak with its stock army: Sarge with the saber, the jeep, the plane and 9 men (rifleman, M. gunner, bazooka, mortar, medic, flame, sweeper, radio man, grenadier), at **level 30 on EASY, 33 on MEDIUM, 37 on HARD and 40 on MEGA** (MEGA adds the tank and leaves the grenadier home). At the lab's levels 30, 33 and 37 the stock army reads the same HP and bar, so EASY, MEDIUM and HARD meet the same men (not every rank between: the stock Sarge's saber reads 29 HP at ranks 38 and 39 against 28 at 30–37; the Claymore Sarge and the heroes climb a little); MEGA's level-40 men are one step tougher. Since Nov 13 (CARD-BLI) the lab's own HARD fight is Isaac's army instead, at commander level 100 (rifleman 25, M. gunner 30, bazooka 20, mortar 22, medic 0, radio man 1; Sarge with the sniper rifle); this page keeps the default ladder's level-37 roster in its HARD columns so the tiers compare, and the HARD bodies are the lab's, born at level 100. The lab fields no hero; the hero rows below show one in command at the same level.

v32.23	Nov 13	**CARD-BLI · THE LAB'S HARD IS ISAAC'S ARMY**	The Boss Lab's intended HARD set is Isaac's own army now (Wyatt, Nov 13: Isaac is the intended level for this fight on HARD): commander level 100, Sarge 11 with the sniper rifle at 52, Jane in command, the jeep, the tank, the plane and 6 men at their own ranks (rifleman 25, M. gunner 30, bazooka 20, mortar 22, medic 0, radio man 1). The lab's HARD fight bears its bodies at level 100 now (THE MINIONS SOAK counts rounds of a level-100 rifleman): a bandit 22 HP (was 18), a sharpshooter 28 (was 24), a lady 62 (was 53), the snake 469 (was 395). This page's HARD columns keep the lab's default ladder, a level-37 roster, so the four tiers and the earlier reads compare: every hit in the hideout is a bar hit, the same at any level.

v31.79 · v32.13 · v32.29	Nov 12 · 13	**CARD-SOS · CARD-HCF · CARD-HKL · THE STORM ON SNOW, THE LOBBY**	His storm's bolts and slugs wear a casing that reads on snow (Nov 12); in the hideout's lobby the three ladies sit on the couch and the king uses all his faces (Nov 13), his looping drawings there are bitmaps so the lobby no longer slows (Nov 12-13). Pictures only: no number of the fight moves (his storm measured above).
v31.31	Nov 10	**CARD-QDC · QUICK DRAW CROAK**	King Croak is **Quick Draw Croak** in every word the game says (Wyatt, Nov 10): the boss, the waves (QUICK DRAW CROAK DRAWS BOTH PISTOLS), the son, the lab and the hideout itself (QUICK DRAW CROAK'S HIDEOUT), read by name; this page says it too. Words only: the ids, the numbers and the drawings are the same.
v31.00	Nov 6	**CARD-RZB · RAZIYA'S BOSS NOTES: THE HIDEOUT AND EVERY FIGHT**	His single shot × 2 · 2 · 2 · 1.5 (C2; EASY · MEDIUM · HARD · MEGA): 4 · 4.4 · 4.4 · 7.2 bar hits (was 2 · 2.2 · 2.2 · 4.8). THE FLOOR (U5): no single hit fells a man other than a rifleman from a full bar; the hit that would leaves him on 15 % of it and the next fells him (measured on every tier: his shot on a rank-0 medic, landing EASY 2 of 2 · MEDIUM 2.2 of 2 · HARD 2.2 of 2 · MEGA 3.6 of 2 bar hits, left him on 15 %, the next shot felled him; a rifleman keeps no floor). So THE LEVEL A MAN FIRST SURVIVES one hit is 0 for everyone but the rifleman (a whole storm, 8 hits, as before), and on MEGA the swallow fells a fresh rifleman but leaves anyone else on the floor (2 swallows). THE CAP (U4): one blow reaches at most 3 · 4 · 4 · 5 men (measured: his storm on that many + 2 men in his cone landed on 3 of 5 · 4 of 6 · 4 of 6 · 5 of 7, every volley; the stampede and the ladies' fire are no blow). C3: the frame he plants a storm his son's storm comes off its clock and every lady lobs a fire patch onto the same men (measured on every tier: 2 ladies, 2 patches at his plant). C4: the snake rings the sand where he will rise and rattles 0.5 s longer, × 0.7 his time on top. C5: a trampled man stands stunned 0.6 · 0.8 · 1 · 1 s (measured). C1: the sharpshooter, the lady, the snake and the son pay × 1.7 · 2 · 3 · 2.5 in dog tags and the drip × 0.7 · 0.6 · 0.6 · 0.6.
v29.72	Nov 4	**CARD-KHP · THE KINGS' +120 HP FROM RANK 30**	Your hero kings (King Yeti, King Rex, Quick Draw Croak and Emperor Bear) carry +120 HP from their own rank 30, flat (Wyatt, Nov 4), and their bar grows by the same 120: at level 30 your hero Quick Draw Croak has 302 HP and a bar of 272 (was 182 and 152). A hero takes every hit whole, so each king stands about 1.8 times the hits he did (the hero rows of WHO SURVIVES); Jane and Princess Croak are as they were.
v29.70	Nov 3	**CARD-BDC2 · NO INSTANT KO · THE HEAVY CLASS**	In a boss fight a blow that KO'd a man outright takes a price instead: 0.9 × the M. gunner's HP at the fight's recommended level, here 31.5 HP on EASY to HARD (35 HP at rank 43 of level 75) and 40.5 on MEGA (45 at rank 66 of 115), landing whole. The hideout has no such blow (the swallow already went through the bar hits' door): measured, the price never ran in any staging of this page, on any tier, on either engine. THE HEAVY CLASS: the bazooka, the commando and the flame carry the larger of their own HP and 2 × the M. gunner's at the same rank: the bazooka 60 HP at level 30 (was 47) and 70 at level 40 (was 60); the commando 60 HP at level 30 (was 55) and 70 at level 40 (was 69); the flame keeps his own HP (higher). Their bar is the same, so WHO SURVIVES moves only where the smaller share crosses a whole hit; the HP a hit costs them (the table in HP) rises.

v31.95	Nov 13 06:50	**CARD-SOK · THE MINIONS SOAK: THE POSSE, THE LADIES AND THE SNAKE BY ROUNDS OF YOUR RIFLEMAN; HIS STORM × 3**	The bandits, the sharpshooters, the ladies and the giant rattlesnake soak a set number of rounds of your rifleman at your commander level: a bandit 4 · 6 · 7 · 9, a sharpshooter 6 · 8 · 9 · 12, a lady 20 · 20 · 20 · 40, the snake — · 120 · 150 · 330 rounds (EASY · MEDIUM · HARD · MEGA; — = the shipped bar). One round of a rifleman at the lab's level (30 · 33 · 100 · 40) is 2.52 · 2.58 · 3.12 · 2.68 HP, so the lab's bodies are a bandit 10 · 15 · 22 · 24 HP (was 2 · 3 · 3 · 18), a sharpshooter — · 21 · 28 · 30 (was — · 3 · 3 · 18), a lady 50 · 52 · 62 · 108 (was 6 · 6 · 6 · 66), the snake — · 309 · 469 · 882 (was — · 120 · 144 · 864); the pour's bandits and sharpshooters take the same number. A party of two or more counts the rounds at the fight's reference level (75 on EASY · MEDIUM · HARD, 115 on MEGA); on MEGA the MEGA hideout rules' × 6 sits inside each row, so the number lands on a multiple of 6. Quick Draw Croak's storm (and his son's) lands every volley × 3 at the door: 1.125 · 1.238 · 1.238 · 2.7 bar hits a volley (were 0.375 · 0.413 · 0.413 · 0.9), a whole storm 9 · 9.9 · 9.9 · 21.6 (were 3 · 3.3 · 3.3 · 7.2); his strong shot, the posse's and the ladies' rounds, the snake's lunge and the stampede as they were. The cells live in the Boss Lab's RULES (three rows for the hideout: the rounds, the party's level, the storm's factor), editable there like every rule.
v29.41	Nov 2 18:12	**CARD-DHP · THE BAZOOKA'S AND COMMANDO'S TENTH-RANK HP DOUBLED, SHOTGUN SARGE'S +20**	The bazooka and the commando gain 10 HP every ten ranks (was 5): at the lab's level 30 the bazooka has 47 HP (was 32) and the commando 55 (was 40); at level 40 the bazooka 60 (was 40) and the commando 69 (was 49). Sarge with the shotgun in his hands gains 20 HP every 10 shotgun ranks: 88 HP at level 30 (was 28), 112 at level 40 (was 32); his other irons are as they were. A bar hit is a share of the bar, so WHO SURVIVES moves only where the smaller share crosses a whole hit; the HP a hit costs them (the table in HP) rises with their HP.
v29.40	Nov 2 18:04	**CARD-FLT · THE FLAME'S TENTH-RANK HP TRIPLED THROUGH LEVEL 50**	The flame's tenth-rank HP through level 50 pays 18 a rung instead of 6 (the rungs above 50 still 6): at the lab's level 30 the flame has 77 HP (was 41), at level 40 he has 99 (was 51). His share of a bar hit is 0.908 now (was 0.915), so WHO SURVIVES moves only where that crosses a whole hit; the HP a hit costs him (the table in HP) rises with his HP.
v29.37	Nov 2 16:50	**CARD-RXT · THE DESIGNERS' TIME-TO-KILL CHART**	Quick Draw Croak's bar for one commander on EASY · MEDIUM · HARD is the chart's number, a stock roster's fire for 15 · 20 · 30 s: 2,252 · 3,003 · 4,504 (was 160 · 192 · 240: the base × the tier's dial); the son's bar rides the same rows: 315 · 420 · 631 (was 22 · 27 · 34). A party's bar is still the solo bar × 1 + 0.9 × (commanders − 1), exact on these tiers; every hit he lands is unchanged, so WHO SURVIVES moved only with the four men's HP above.
v29.30	Nov 2 15:46	**CARD-PDT · THE PLAYER-DAMAGE-THRESHOLD PASS (MEGA)**	Quick Draw Croak's MEGA bar for one commander is the pass's table number, 5,535, written as the wave row's multiplier to four decimals; the MEGA hideout rules' × 6 lands after the rounding, so the bar born is 5,532 (was 2,592). The son's row rides with his father's: 1,164 (was 546); the brood's four keep 546 each. A party's MEGA bar lands 7 to 29 HP over the solo bar × 1 + 0.9 × (commanders − 1) (the × 6 after the rounding). EASY · MEDIUM · HARD went to the chart (the row above).
v29.17	Nov 1 23:53	**CARD-DMP · THE DAMPER**	Every enemy blow on your men lands at 50 % in the campaign and the boss fights (the damper takes 50 % off on every tier: read from the game and measured in this fight's lab fight), so a man stands about twice the blows he did: every survive, first-survive and HP number on this page counts it; the bar hits a hit carries are unchanged. The snake's swallow goes through the same door: on MEDIUM and HARD a fresh man now stands it; on MEGA it still empties a full bar (since v31.00 THE FLOOR stands anyone but a rifleman on 15 %: the row above).
v27.55	Oct 27	**CARD-MKC · THE MEGA HIDEOUT ×6 / ×2**	On MEGA every body on his side is born with 6 times the bar (Quick Draw Croak 5,532, the first son 1,164, each of the brood 546, a lady 108, the snake 882, a bandit 24, a sharpshooter 30: since v31.95 THE MINIONS SOAK sets those four (its row), the × 6 inside each row, so each lands on a multiple of 6) and every hit they land counts 2 times. Not doubled: the stampede and the ladies' ground fire (they belong to nobody). Measured on both engines.

v28.41 · v28.46	Oct 29 · 30	**CARD-BLB · CARD-BLP · THE BOSS LAB**	The lab fights Quick Draw Croak with its stock army at level 30 on EASY rising to 40 on MEGA (30 · 33 · 37 · 40). Every "level" number on this page is that army.
v28.65	Oct 30 19:39	**CARD-LRB · ONE HP NUMBER**	Every hit in the hideout is a bar hit, and since v28.65 a bar hit lands a little lighter on tough men: 90 % + 10 % × bar ÷ HP (a level-30 flame takes 0.908 of each, a rifleman 0.933). Before that every man took them whole.
v28.65 + v28.74	Oct 30 · Oct 31 00:11	**CARD-LRB + CARD-HP3 · TENTH-RANK HP**	Extra HP every 10 ranks: M. gunner +1, bazooka +10 (was +5), grenadier +4, flame +18 through level 50 and +6 above it (was +6 at every rung), commando +10 (was +5), spy +1; Sarge with the shotgun in his hands +20 every 10 shotgun ranks (the rows above). Here it only nudges the share above (a bar hit is a share of the bar, not of the HP).
v28.68	Oct 30 23:31	**CARD-BRB · THE BOMBER**	Your bomber flies in every boss fight now, the hideout included.
v28.57 · v28.58 · v28.61	Oct 30	**CARD-PHG · THE PISTOLS BY THE GRIP**	Quick Draw Croak (and Jane) hold their pistols by the grip on every drawing. Art only: no number moved.
v28.63	Oct 30 19:04	**CARD-OLR · AL'S DRAWINGS**	Little Quick Draw Croak's treasure drawing follows Al's character page. Art only.
v28.25	Oct 29	**CARD-LMK · THE BANDIT MASK**	The bandit mask is Quick Draw Croak's prize now (it swapped seats with the lasso). The fight itself is unchanged.
—	—	**STILL THE SAME SINCE OCT 25**	Compared line by line with the Oct 25 client on Oct 31 and read again on v29.23, v29.51 and v32.45: his storm's reach and clocks, cover, the hunt and the break, the bar hits the son's shot, the posse, the ladies, the snake and the stampede carry, the pour and every wave sheet's head-count read the same; what moved is in the rows above (the posse's, the ladies' and the snake's bodies and the storms' landing since v31.95, the bars, the men's HP, the damper, his single shot, THE FLOOR and THE CAP, the lab's HARD set, the kings' HP, the name). His treasure's picture (Oct 16) and your hero Quick Draw Croak's extra HP (v28.93: his row among the heroes) are the only other lines.

How a hit is counted

Your men carry **HP** (the number on their unit sheet) and a **health bar** cut into a few *bar hits*: 5 to 7 for a level-30 man, 7 to 9 at rank 100, 11 for the saber Sarge and 22 with the Claymore, 43 to 272 for a hero. A man is KO'd when the bar hits he has taken fill his bar.

- **THE DAMPER** (since v29.17): every hit an enemy lands on your men, Sarge and the heroes in the campaign and the boss fights lands at **50 %** of the bar hits it carries (the game takes 50 % off on every tier, read on every tier of this fight and measured in its lab fight); every survive, first-survive and HP number on this page counts it.
- **THE FLOOR** (since v31.00, CARD-RZB, on every tier here): no single hit fells a man other than a rifleman from a full bar. The hit that would leaves him on **15 %** of his bar and the next hit that reaches him fells him, so he needs at least 2 hits from a full bar (measured on every tier: his shot on a rank-0 medic, whose bar of 2 it would empty, left him on 15 % and the next shot felled him; a rank-0 rifleman keeps no floor, and on MEGA fell to one shot). Sarge and the heroes count as men other than riflemen.
- **THE CAP** (since v31.00): one blow reaches at most **3 · 4 · 4 · 5** men (EASY · MEDIUM · HARD · MEGA); a blow is one spot inside 0.75 s, so his storm's volleys land on that many of the men in his cone and the rest are untouched (measured: 3 of 5 · 4 of 6 · 4 of 6 · 5 of 7). The stampede and the ladies' fire are not blows.

- **NO INSTANT KO** (since v29.70, CARD-BDC2): a blow that would KO outright takes 31.5 HP (40.5 on MEGA) instead. Nothing in the hideout is such a blow (measured: the price never ran here).
- Every attack in the hideout carries a number of bar hits (the tables below). Since v28.65 a man takes 90 % + 10 % × bar ÷ HP of what lands: 0.933 for a level-30 rifleman, 0.908 for a flame. A hero takes all of what lands.
- In HP, one bar hit lands as that man's HP ÷ his bar × 50 % (the damper) × his share: 1.4 HP of a level-30 rifleman's 18, 5.82 of a flame's 77. The HP figures on this page are that conversion.
- A man who takes no hit for 4 s mends. Saves still roll on every hit: a jetting or dragged man cannot be touched, the pet shield, the deflect dome, Sarge's and the Commander's absorbs, the saber's block (one in two from rank 20) and the dodges. The snake's swallow is built to KO (it carries his whole bar left + 1, × 2 on MEGA), but since the damper it lands at 50 % like every hit: on MEDIUM and HARD a fresh man stands it, and 3 or 4 in a row KO a stock man (measured: a fresh level-33 flame on MEDIUM took 3.2 of his 6 bar hits and stood); on MEGA it still empties a full bar, so a rifleman falls to one and anyone else stands on 15 % of his bar (THE FLOOR since v31.00) and falls to the next (measured: a fresh level-40 flame on MEGA).

HP and bar = the man's sheet HP and his bar at level 30 to 37 · at level 40; a → b in a cell = it rises between level 30 and 37 (a at 30, b at 37; hover for every level): SARGE · CLAYMORE, KING YETI, KING REX, QUICK DRAW CROAK, JANE, EMPEROR BEAR, PRINCESS CROAK. A hero takes all of what lands, whatever his HP. The snake's swallow is not in the table: built to KO (it carries his whole bar left + 1, × 2 on MEGA), but since the damper it lands at 50 % like every hit: on MEDIUM and HARD a fresh man stands it, and 3 or 4 in a row KO a stock man; on MEGA it still empties a full bar, so a rifleman falls to one and anyone else stands on 15 % of his bar (THE FLOOR since v31.00) and falls to the next; the fire column counts beats (0.5 s apart).

The level a man first survives one hit

The lowest rank at which a fresh man lives through one of that hit (what it lands is less than his bar). The small number under each column is the bar hits the hit carries (it lands at 50 % of that, × his share). **Green** = he already does at the lab's level for that tier; — = not even at rank 100; 0 = always. Since v31.00 THE FLOOR makes it **0 for everyone but the rifleman** on every tier here: one hit never fells him from a full bar (hover a 0 for the rank he would need without it). A whole storm is 8 hits, so its column reads as before.

Read from the game's own ladder at every rank 0–100 (his bar and HP, the tenth-rank extras included; no gifts, soul or gear). Sarge's rows read the iron at the same rank as the man. MEDIUM and HARD carry the same hits, so they share a column.

Read from the game's own wave sheet with 1, 2, 3, 4, 5 and 10 commanders in the fight. EASY · MEDIUM · HARD: the solo bar × 1 + 0.9 × (commanders – 1), to the HP; MEGA: the × 6 lands after the rounding, so a party's bar is 7 to 29 HP over that. Outside the lab, the Mission Board's Day-4 order raises the MEGA king's bar × 2.5 and his storm's reach × 2 for that day's fight.

Quick Draw Croak walks on 2 s after the bell, alone; every other wave waits for his bar to cross its gate, and he bolts for cover as it walks on. The stampede opens the fight at 5 s and comes back every 25 s. The hideout has no ULTRA MEGA.

How this was read and checked

The client v32.45 (index.html md5 3a46a5281956aeaf75ac23e3b689a4ba, the live client, pinned once for the read and every proof on both engines) was opened headless and read with the game's own functions: every table, every tier's wave sheet and bars, the lab's stock army on each tier, every man's bar and HP at every rank. Then each damage number was **measured on the real machines** in a BOSS LAB fight on every tier: every attacker was born through its own wave row (so the tier's and MEGA's stamps were the game's own), stood near men at that tier's lab level and left to its own brain until it hit. Quick Draw Croak's strong shot and storm, Little Quick Draw Croak's (and on MEGA a son of the brood's) shot and storm, a bandit's, a sharpshooter's and a lady's round on riflemen, M. gunners, flames and medics, the ladies' fire, the rattlesnake's lunge and swallow, the stampede (and the stun it leaves), and every body's bar as born; on every tier the damper's share the lab fight takes off, and on every landed hit the damper's one seat; since v31.00 CARD-RZB's and CARD-BDC2's cells where each lab fight stands, his single shot on a rank-0 medic and a rank-0 rifleman (THE FLOOR), his storm on as many men as one blow reaches + 2 (THE CAP), and the KO price's own count (it never ran). Chrome 125/125 · WebKit 125/125 checks passed with zero page errors; the page rebuilt every one of the 506 measured hits from the read and they all agree; the two engines read every number the same.
