

KING REX'S LAIR · EVERY UNIT, EVERY DIFFICULTY

What every dinosaur and King Rex does to your men on EASY, MEDIUM, HARD, MEGA and ULTRA MEGA, with every body's HP and head-count · read out of the live game v32.45 on Nov 14, 2026 14:06 EST · every damage number checked on the game's own machines (Chrome 166/166 · WebKit 166/166) · for Raziya

The one thing to know: since v29.70 **nothing in this fight is an instant KO** but the triceratops' charge on a light man (v32.16, Wyatt's word): the boulder and King Rex's bite take **22.5 HP on EASY · MEDIUM · HARD, 31.5 on MEGA and ULTRA MEGA**, whole. On EASY to MEGA no other single hit fells a man other than a rifleman from a full bar (he stands on **15 %**), one blow reaches at most 3 · 4 · 4 · 5 men, and fire burns (a light front, then a burn on the man). Since v28.65 the dinosaurs' damage **changes with difficulty**. The sprinter's bite and the pterodactyl's dive hit for **15 · 30 · 45 · 60 · 65 HP** (EASY · MEDIUM · HARD · MEGA · ULTRA MEGA), the bruiser's slam for double, and the dilophosaurus burns **50 HP a second** (ULTRA MEGA 90). The spitter and the king's hop and tail are the same on every tier.

THE BOSS LAB fights King Rex at **LEVEL 20**: Sarge with the saber, the scout jeep and nine men at rank 20 (rifleman, M. gunner, bazooka, mortar, medic, flame, sweeper, radio man, grenadier). The spy (from 30) and the commando (from 50) are a tap away in THE PLATOON. Every "level 20" number on this page is that army.

live since	when	card	what it does in this fight
v28.65	Oct 30 19:39	**CARD-LRB · THE LAIR'S DINOS**	The sprinter's bite, the pterodactyl's dive and the triceratops' charge stop being KOs: they hit for 15 · 30 · 45 · 60 · 65 HP on EASY · MEDIUM · HARD · MEGA · ULTRA MEGA. The bruiser's slam hits for double (30 · 60 · 90 · 120 · 130 HP). The dilophosaurus burns 50 HP a second on MEDIUM, HARD and MEGA and 90 on ULTRA MEGA (EASY as before). The boulder and King Rex's bite stay KOs.
v28.65	Oct 30 19:39	**CARD-LRB · HP ×3**	Triceratops 12 → 36 HP and dilophosaurus 7 → 21 HP at the base, so every tier's body is three times as tough until v31.95 (since THE MINIONS SOAK a body on EASY to MEGA is a set number of rounds of your rifleman instead: the CARD-SOK row) (the ULTRA MEGA guard's trikes 570 HP).
v28.65	Oct 30 19:39	**CARD-LRB · ONE HP NUMBER**	Your man's HP is the number on his unit sheet in every mode (the same one the battleground uses). The older hits that count in bar hits (the spitter, the king's fire, his hop and tail) now land a little lighter on tough men: 90 % + 10 % × bar ÷ HP of a hit.
v28.65	Oct 30 19:39	**CARD-LRB · THE CLUTCH**	Every clutch (the eruption's nests, the last eruption) lands one egg every 0.2 s a nest, side by side, each still hatching on its old moment.
v28.65 + v28.74	Oct 30 · Oct 31 00:11	**CARD-LRB + CARD-HP3 · TENTH-RANK HP**	Extra HP every 10 ranks: M. gunner +1, bazooka +10, grenadier +4, flame +6, commando +10, spy +1. At level 20 the flame and the commando have 55 HP and lived through a MEDIUM bite with 25 HP until the damper below (no class did on Oct 30).

v28.68	Oct 30 23:31	**CARD-BRB · THE BOMBER**	Your bomber flies in every boss fight now and aims at the thickest knot of dinos (or the king). Price and damage unchanged.
v28.93	Oct 31 22:56	**CARD-KCF · KING CROAK, YOUR HERO**	King Croak on your side is tougher: his bar starts at 131 (was 31), and at level 20 he stands with 169 HP and a bar of 146 (THE HEROES rows below).
v29.17	Nov 1 23:53	**CARD-DMP · THE DAMPER**	Every enemy blow on your men lands at 50 % in the campaign and the boss fights (50 % off on every tier, the Boss Lab's RULES): a 15 HP bite lands 7.5, the king's fire beat 5 of its 10 bar hits; a KO (the boulder, King Rex's bite) is still a KO. A man stands about twice the blows he did, and every survive number on this page counts it.
v29.37 · v29.40 · v29.41	Nov 2	**CARD-RXT (+ CARD-PDT) · CARD-FLT · CARD-DHP · READ AGAIN**	Read again on v29.51 after the day's cards: King Rex's bars for one commander on EASY · MEDIUM · HARD follow the designers' time-to-kill chart (v29.37: the court 790 · 1,009 · 1,507, the angry return 790 · 1,098 · 1,651) and on MEGA the player-damage-threshold pass's number (4,185 · 4,586); the men's tenth-rank HP moved (v29.40: the flame's rungs through level 50 tripled; v29.41: the bazooka's and commando's doubled): at level 20 the flame 55 HP, the bazooka 50, the commando 50. WHO SURVIVES and THE LEVEL A MAN FIRST SURVIVES count it.
v29.51	Nov 2	**CARD-UMH · ULTRA MEGA HP**	ULTRA MEGA: King Rex's two bars are flat for any party: 15,000 the court and 15,000 the angry return with one commander and with ten (each extra commander added 0.9 of the solo bar there before). EASY to MEGA keep the party law.
v31.95	Nov 13 06:50	**CARD-SOK · THE MINIONS SOAK: THE LAIR'S DINOS BY ROUNDS OF YOUR RIFLEMAN**	THE MINIONS SOAK: from EASY to MEGA every dinosaur's body is a set number of rounds of your rifleman at your commander level (the Boss Lab: its level 20; a party of two or more: level 35, 75 on MEGA): a sprinter 2 · 3 · 4 · 5, a pterodactyl 2 · 3 · 4 · 5, a spitter 4 · 6 · 8 · 10, an egg 3 · 4 · 6 · 8, a bruiser 12 · 18 · 24 · 30, a triceratops 30 · 45 · 60 · 75, a stegosaurus 10 · 15 · 20 · 25, a dilophosaurus 20 · 30 · 40 · 50 rounds (EASY · MEDIUM · HARD · MEGA). One round of a level-20 rifleman is 2.29 HP, so at the lab's level the bodies are a sprinter 5 · 7 · 9 · 11 HP (was 1 · 1 · 2 · 2), a pterodactyl 5 · 7 · 9 · 11 HP (was 2 · 3 · 4 · 5), a spitter 9 · 14 · 18 · 23 HP (was 5 · 8 · 11 · 13), an egg 7 · 9 · 14 · 18 HP (was 4 · 6 · 9 · 11), a bruiser 28 · 41 · 55 · 69 HP (was 12 · 18 · 26 · 32), a triceratops 69 · 103 · 138 · 172 HP (was 36 · 54 · 79 · 95), a stegosaurus 23 · 34 · 46 · 57 HP (was 10 · 15 · 22 · 26), a dilophosaurus 46 · 69 · 92 · 115 HP (was 21 · 32 · 46 · 55) (the 'was' is the dashboard's read of v29.45); an egg's hatchling is born with the same number, and so are the eruption's pours and clutches. ULTRA MEGA keeps the night's own bodies (the ×0.25 / ×0.5 and the king's guard). The dinosaurs' hits are as they were: this card gives them staying power, not teeth. The cells live in the Boss Lab's RULES (two rows for the lair: the rounds and the party's level), editable there like every rule.
v29.70	Nov 3	**CARD-BDC2 · NO INSTANT KO + THE HEAVY CLASS**	Nothing in a boss fight is an instant KO any more (Isaac's design pass, Wyatt's word): the stegosaurus' boulder and King Rex's bite, KOs on the v29.51 page, take 90 % of the M. gunner's HP at the chart's rank for the lair's level: 22.5 HP on EASY · MEDIUM · HARD, 31.5 on MEGA and ULTRA MEGA, landing whole (the damper does not take its half). At level 20 that KOs the rifleman (14 HP) and the medic (11), and leaves the M. gunner 2.5 of his 25 HP on EASY to HARD and the flame 32.5 (the medic, the M. gunner on MEGA: the floor below). THE HEAVY CLASS: the commando, the flame and the bazooka carry max(their own HP, twice the M. gunner's) on the sheet every dino hit reads: at level 20 the commando 50 HP (was 41), the bazooka 50 (was 33), the flame 55 (his own, unchanged); their bars are not touched.
v31.00	Nov 6	**CARD-RZB · RAZIYA'S BOSS NOTES (EASY to MEGA; ULTRA MEGA reads none of it)**	THE FLOOR: no single hit fells a man other than a rifleman from a full bar: the hit that would leaves him on 15 % of it and the next one fells him (a rifleman still falls to one; a burn is not held back). THE CAP: one blow reaches at most 3 · 4 · 4 · 5 men. FIRE BURNS: the dilophosaurus' beat is a light front of 1.5 · 2 · 3 · 4 HP and a burn on the man of 1.5 · 2 · 2.5 · 3 HP a second for 3 s; King Rex's a front of 3 · 4 · 5 · 6 HP and a burn of 4 · 5 · 6 · 8 HP a second for 4 s; all of it whole (was: the dilo 1 bar hit a beat on EASY and 25 HP a beat from MEDIUM, the king 10 bar hits a beat, both at the damper's half). Also: a green dino rests 0.8 · 0.7 · 0.6 · 0.5 s after a bite, a pterodactyl's dive ends on its first man, a bazooka hits the triceratops like a hull and he crawls 0.6 · 0.6 · 0.5 · 0.5 s after each man he runs over, every dino pays ×1.4 dog tags, the nests deal one after another and King Rex does not leap while an egg stands.

live since	when	card	what it does in this fight
v31.04	Nov 8	**CARD-KRF · HIS OWN FIRE**	King Rex breathes his own flowing fire picture again (Laura's breath stays on the little fire dinos and the pets). A picture only: no number on this page moves.
v32.16	Nov 13	**CARD-KRX2 · THE KING REX FIGHT PATCH**	THE TRICERATOPS HITS HARDER (Wyatt: "one-shotting any light unit at any level"): in every King Rex fight his charge KOs a light man in one hit on every tier (the price and the floor stand aside for it); a heavy (bazooka, commando, flame, grenadier) is KO'd the same under level 60 on HARD and 80 on MEGA and ULTRA MEGA; at or over the line, and on EASY and MEDIUM, he takes 70 % of his bar, whole, and stands on 30 %, rocked back (was 15 · 30 · 45 · 60 · 65 HP at the damper's half). Also: the lair's floor is volcanic dirt; at phase 2 he leaps to the far end instead of vanishing; MEGA phase 2: the clutch eggs and every hatchling ×2, the angry King Rex ×5 (his MEGA bar 22,928, was 4,586).
v32.31	Nov 13	**CARD-KRX2R2 · THE LITTLE FIRE DINOS, ROUND 2**	The dilophosaurus' jet is narrower (0.35 of a king's width) and shorter: his reach 250 → 190 px, aimed at the man's body, so he breathes only at a man his fire reaches. Its HP: CARD-RZB's row above.
—	—	**UNCHANGED**	Read on v32.45 against the v29.51 read: every table the read carries (the dinos' HP hits, King Rex's clock, reach, wedge, hop, tail, charge, eruption, the bodies, every wave sheet and head-count, the spitter, the toy box) reads the same; his bars are the same but MEGA's angry return (CARD-KRX2 above). The damper lands the dinos' HP and bar hits at 50 %; the price, the wobble hit and the fire land whole.

How a hit is counted

Your men carry **HP**: the number on their unit sheet, the same in every mode (the flame has 55 at level 20, the rifleman 14). There are three kinds of hit in this fight:

- **HP hits** (the sprinter, the pterodactyl, the bruiser, the dilophosaurus on ULTRA MEGA, the triceratops on Sarge and the heroes): a hit of D lands D × 0.5 (THE DAMPER, below) and takes that off his HP. A fresh man with that much HP or less is KO'd by one hit.
- **Priced hits** (the boulder, King Rex's bite; KOs until v29.70): 22.5 HP on EASY · MEDIUM · HARD, 31.5 on MEGA and ULTRA MEGA off his HP, whole (the damper does not take its half): a man with more HP stands.
- **THE FLOOR** (since v31.00, EASY to MEGA): a hit that would empty the full bar of anyone but a rifleman leaves him on 15 % of it; the next hit fells him. So from a full bar every man but the rifleman needs two hits of anything (ULTRA MEGA: no floor).
- **THE TRICERATOPS** (since v32.16): his charge KOs a light man in one hit at any level on every tier; a heavy (bazooka, commando, flame, grenadier) takes 70 % of his bar on EASY and MEDIUM, and on HARD from level 60, on MEGA and ULTRA MEGA from 80 (under the line: KO).
- **Fire** (since v31.00, EASY to MEGA): a beat of the dilophosaurus or King Rex is a light front and a burn on the man (a bite every 0.5 s), all whole. The fire columns below count **breaths**: a breath is its 2 beats and the burn they leave, run out.
- **Bar hits** (the spitter's glob, the king's hop, his tail, his fire on ULTRA MEGA): every man's health bar is also cut into a few *bar hits* (5 to 7 for a level-20 man, 8 at rank 100, more for the saber Sarge and the heroes). One bar hit is about a sixth of a level-20 man's HP: 2.2 HP of a rifleman's 14, 8.3 of a flame's 55. Since v28.65 a bar hit lands a little lighter on tough men (90 % + 10 % × bar ÷ HP), and since v29.17 at 50 % of that (below).

> **THE DAMPER** (since v29.17, a row in the Boss Lab's RULES): every HP hit and bar hit an enemy lands on your men, Sarge, a hero or a vehicle in the campaign and the boss fights lands at **50 %** (50 % off on every tier): a 15 HP bite lands 7.5, a bar hit 0.5 of one; the price, the triceratops' wobble hit and the fire land whole. Every number in WHO SURVIVES and THE LEVEL A MAN FIRST SURVIVES counts it.

A man who takes no hit for 4 s mends. Saves still roll on every hit: a jetting or dragged man cannot be touched, a cloak hides the spy from the triceratops and the sprinter, the pet shield, the deflect dome, Sarge's and the Commander's absorbs, the saber's block and the dodges. A vehicle has 6 hits of hull: a dilophosaurus beat takes 0.5 of one and every other HP or KO

strike one (a dent, as shipped), the hop and the tail sweep pass under it; the king's fire wrecks it in two beats (one breath) and a tail lash takes 5 of its 6.

HP = the man's sheet HP at rank 20 (a hero: his own HP pool, which a dino's HP hit comes off). The bite / dive and the slam columns are the HP tables above (with the floor on EASY to MEGA); the charge column is CARD-KRX2's; the two fire columns count breaths (2 beats and the burn they leave, run out: a dilo that breathes again before the burn is out renews it instead of adding to it, so a man can last a little longer than the count); the spit glob is 2 bar hits, the hop 1, the tail lash 10, at 50 % (THE DAMPER); the king's bite and the boulder are the price, whole. The tail sweep (1 bar hit, MEGA and ULTRA MEGA, only after a saber hit) reads like the hop.

The level a man first survives one hit

The lowest rank at which a fresh man lives through one hit (his sheet HP is more than the hit as it lands: the small number under each tier). On EASY to MEGA every man but the rifleman lives through one hit at any rank (0: THE FLOOR, he stands on 15 %); the triceratops' charge KOs a light man at any rank (—) and spares a heavy from the tier's line. **Green** = he already does at the lab's level 20; — = not even at rank 100.

Since v31.00 on EASY to MEGA (CARD-RZB R5) a beat is a light front and the man keeps burning after it: one breath (its 2 beats and the burn they leave) takes 24 · 30.5 · 37 · 48 HP, whole (the damper does not take its half), so at level 20 on EASY one breath KOs every man of the army but the M. gunner (2), the bazooka (3), the flame (3), the commando (3), the shotgun Sarge (3) and the Claymore Sarge (3); on MEGA one breath KOs every man of the army but the bazooka (2), the flame (2), the commando (2), the shotgun Sarge (2) and the Claymore Sarge (2). ULTRA MEGA: 100 bar hits a beat (it lands 50), one breath KOs every man and hero at level 20 but King Croak (2). No limit on how many it burns; his own dinos never burn; a trench is cover; a jetting or dragged man cannot burn; plates, blocks, ducks, dodges and FIREPROOF still roll.

The first waves stream on a drum: 10 s grace, then about 15 s apart. The court wave waits for a swept field; the eruption waits for the king at his 5 % mark. The angry king leaps back 10 s into the eruption; the clutch lands at 7 s and hatches 7.2 s later.

How this was read and checked

The game's client v32.45 (index.html md5 3a46a5281956aeaf75ac23e3b689a4ba) was opened headless and read with the game's own functions: every table, every tier's wave sheet, every body as it spawns, every man's HP at every rank, and the damper's share in a BOSS LAB fight on every tier. Then each damage number was **measured on the real machines** in a BOSS LAB fight on every tier, every blow landing through the damper: the sprinter, pterodactyl, triceratops (CARD-KRX2's KO and wobble hit) and bruiser striking level-20 riflemen, M. gunners, flames and medics (the floor where a hit would empty a full bar); the dilophosaurus' breath (every front and burn bite); a spitter's glob; a stegosaurus' boulder on a rank-100 M. gunner and a level-20 medic (the price, the floor); King Rex's bite (his real sprint) on a flame, a rifleman and a medic, his breath (the front, then the burn run out), hop landing, tail lash, tail sweep, and one hop landing on seven men (the cap); and CARD-BDC2's price and CARD-RZB's floor and cap read in the lab fight on every tier. Chrome 166/166 · WebKit 166/166 checks passed, zero page errors, and the two engines read every number the same.
